The Federal Highway Administration’s Western Federal Lands Highway Division (WFLHD) is soliciting public comments on the Environmental Assessment for the Kenai Spur Highway Extension (KSHE) Project. WFLHD invites comments on the preferred alternative, an extension of the Kenai Spur Highway KSH to be an 8.1 mile, single-lane gravel road extending to a turnaround just beyond the existing crossing of Otter Creek. The purpose of the project is to provide a stable, year-round traveling surface for residents of Gray Cliff and Moose Point Subdivision and recreationalists going beyond to Kenai NWR. Implementation of this project will restrict off-tracking by off-road vehicles and rectify on-going environmental degradation and an on-going source of sedimentation and pollution into Leif Creek which discharges into Cook Inlet. The Environmental Assessment is available on WFLHD’s website: https://flh.fhwa.dot.gov/projects/ak/kenai/. The Environmental Assessment is also available on the Kenai Peninsula Borough website: http://www.kpb.us/NRDEXT

The Environmental Assessment can also be requested by contacting Steve Morrow at (360) 619-7811 or stephen.morrow@dot.gov. All interested persons wishing to submit comments on the Environmental Assessment for WFLHD’s consideration may do so in writing on or before February 15, 2018. Please direct comments to Steve Morrow at stephen.morrow@dot.gov. Paper copies may be submitted to:
